What We Do

Feel the Difference in Cushioning Performance

Protective Packing

Edge Protector

Customized Foam Packing

Critical Material Handling Packaging

- Protect your damage-prone products
- Sunrise Enterprises is in the engineered foamed products industry and has been pioneering foamed products since its founding in 2018
- We develop products that take full advantage of the potential of foamed products for virtually every field of industry, where they contribute to developing industry and enriching people's lives around the world

EPE FOAM PROFILES

Ideal for critical products protection from damage

- Very good compression strength compared to other EPE foam sheets.
- Very good flexibility helps no tear off like thermocol.
- Moisture resistant and resilient • Resistant to humidity
- Does not absorb any water

EDGE PROTECTOR

Ideal for critical products protection from damage

We offer stacking strength edge board which is specifically manufactured to add strength to the stacked products.

Our stacking strength edge foam boards makes the packed products high on endurance to the adverse conditions.

FOAM GASKETS

Ideal Concealed Wrapper

Ideal for Gasketing. Cushioning. Sealing. Mounting. Insulation. Noise reduction. Vibration control. Electrical absorption.
Widely used in Appliance, Automotive, HVAC, Medical, Electronic and Lighting.

STRETCH FILMS

Ideal for light products wrapping

Stretch wraps: a highly stretchable plastic film commonly made from linear low density poly-ethylene (LLDPE) that is wrapped around items.

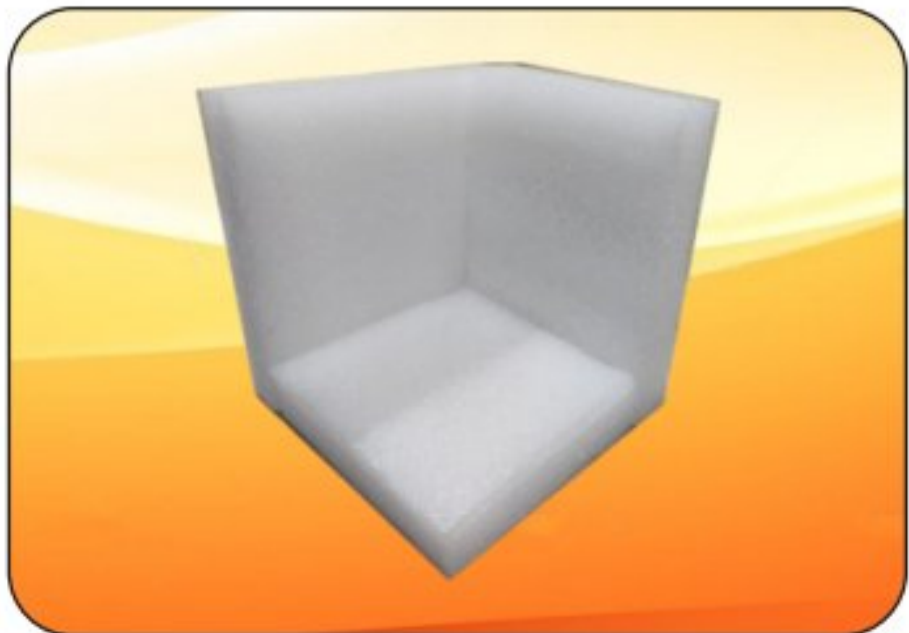

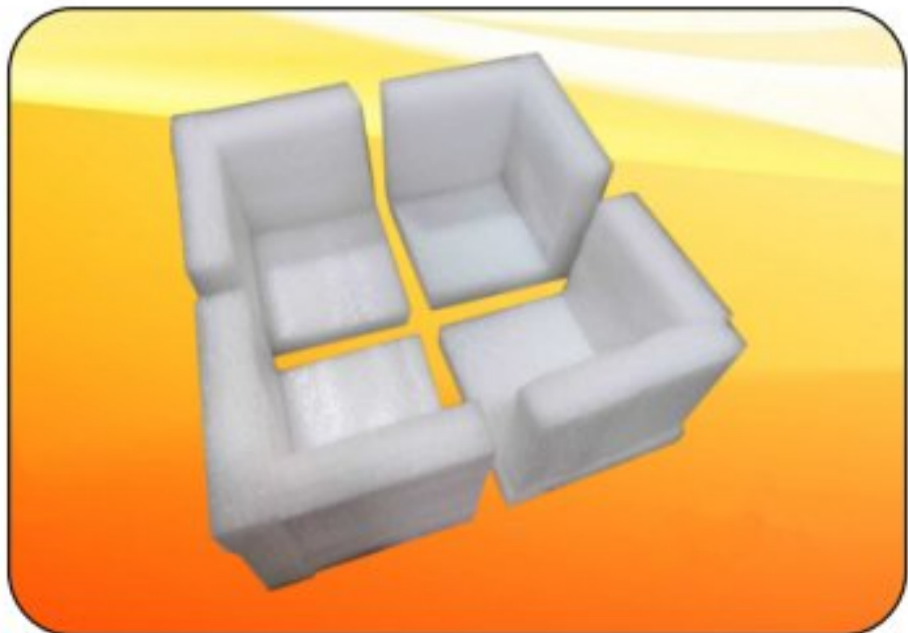

PACKING TAPES

Ideal Concealed wrapper

Packing Tapes: Considered a pressure sensitive tape used in a wide variety of applications, commonly used for sealing boxes and packages for shipments. The most common widths are 2-3 inches wide and made from a poly propylene or polyester backing.
